ABOUT ME

Experienced Senior Frontend Engineer with a strong background in JavaScript, mobile, and web development. Proven track record in leading full software development lifecycle, ensuring code quality, automated testing, and timely delivery.

WORK EXPERIENCE

2023 - Present

Vechain - Blockchain

Senior Frontend Developer

Led the successful development of VeWorld, a self-custodial crypto wallet with 100,000+ downloads on iOS and Android, overseeing the entire mobile app lifecycle, React Native development, deployment, UX/UI review, and integration with blockchain DApps.

2021 - 2022

Kraken - Cryptocurrency Exchange

Senior Frontend Developer

Developed and implemented a comprehensive trading panel on Kraken Pro, facilitating the creation and management of diverse order types and positions within the platform's interface.

2019 - 2021

Illimity - Bank

Senior Frontend Developer

Designed and developed a robust Home Banking Mobile and Web Application, utilizing TypeScript, React, React Native, and various technologies, featuring critical functionalities such as international transfers, cash deposits in shops, AIS & PSD2 payments.

2017 - 2019

Vas - Software company

Fullstack Developer

Integral contributor to the development of diverse platforms and websites, employing TypeScript, React, React Native, Node, Express, and other technologies. Notable projects include a 'Supply Chain Management' simulation and bespoke websites for architects and an international energy company.

2016 - 2017

Object Method srl / University of Siena

Fullstack Developer

Architected an ERP system and executed multiple projects utilizing a technology stack including Node, MySQL, Angular, React, Android, iOS, Swift, PHP, Java, XML, and SQLite, with expertise extending to developing a social network Android app.
